

Smart Schools Bond Act Notice of Intent to Amend Smart Schools Plan 101 – Device

The original plan to replace the entry control system at Cicero North Syracuse High School, North Syracuse Junior High School, and Main Street was projected to cost \$170,363. Materials and labor came in lower with the competitive bidding process and the project finished with a total of \$96,013.12. Therefore, we are notifying the citizens of the North Syracuse Central School District of our intent to amend the original plan and to use the balance of \$74,349.88 on classroom technology.

This amendment will allow us to purchase new touch screen Chromebooks and new interactive boards for the classroom. The district has a large number of Chromebooks and Smart Boards that are at the end of life. This will allow us to replace this with current technology to support education.
